

EDUCATION

Course	College/University	Year	CGPA/%
B.Tech computer science Engineering Intermediate/+2	Srm University	2022-26	7.35
10th Class	Himalaya Public Sr Sec School	2020-21	75.00
	Himalaya Public Sr Sec School	2018-19	75.00

WORK EXPERIENCE

- **Web Developer Intern | codeSoft** [july'24-august'24]
 - Developed job board, quiz maker,e-commerce, using OpenAI APIs
 - Developed 15+ reusable components, speeding development process
 - Development technologies: AstroJS, NextJS

SKILLS

- **Programming Languages:** JavaScript, TypeScript, C++, Python, Java, Rust
- **Tools & Frameworks:** React, NextJS, Spring Boot, Spring Security, MongoDB, GraphQL, Google Cloud, Redis,

PROJECTS

- **all projects** <https://github.com/ishagarg4321>

Achivements

- In my journey as a student at SRM University Haryana, I have actively participated in various hackathons and competitions, showcasing my skills and passion for technology and innovation.
- One of the memorable experiences was participating in the RC Bootcamp where I, along with my team, designed and built an RC car in 2023. Our hard work and dedication paid off when we were awarded the 2nd runner-up position in the competition. It was a thrilling 36-hour hackathon that tested our technical abilities and teamwork.
- In December 2023, I took part in SRM Build 4.0 and worked on developing a website for "Disaster Management". The 36-hour hackathon was a challenging yet rewarding experience that allowed me to apply my coding skills to create a solution that could potentially help in managing disasters more effectively.
- Another significant achievement was during SRM Build 5.0 Fintech edition in May 2024, where I collaborated with a talented team to create a personal finance management website. Our innovative solution impressed the judges, and we secured the 2nd position in the 24-hour hackathon.
- The recognition of our hard work came in the form of a silver medal and some exciting goodies. These experiences have not only honed my technical skills but have also taught me the importance of teamwork, perseverance, and creative problem-solving. I am grateful for the opportunities provided by SRM University that have allowed me to grow and excel in the field of technology and innovation.
